

# OL<sup>®</sup> Connect Desktop

Enhance print production and create highly personalized promotional communications.

## FEATURES AND FUNCTIONS

### Interface

**The Designer:** Create print templates with a user-friendly design tool to generate highly personalized communications

**Welcome screen:** Easy access to resources and product information including blogs, tutorials, samples, templates, learning center, and more

### Template creation and personalization

**PDF based template creation:** Overlay the design created in third-party applications with personalized elements

**Microsoft Word based template creation:** Produce fully editable templates from Microsoft Word documents

**Expressions:** Utilize text-based expressions to automatically replace data placeholders with their corresponding values from a dataset

**Scripting:** Advanced users can leverage extended scripting capabilities to execute more complex personalization tasks

**Content elements:** Design personalized templates with variable text, conditional content, dynamic images, barcodes, and conditionally print or skip sections

**Copyfit:** Allow automatic text adjustment in case of text overflow

**Open last used data file:** Apply data import settings from previous sessions

### Print production and output

**Various print outputs:** PDF, PDF/A, PDF/VT, PCL, PPML, and PostScript (including VIPP and VPS)

**Optimized output:** Accelerate printing and processes by creating smaller spool files

**Reusable print presets:** Enhance production by saving and reusing job and output options

**Postal barcodes:** Insert postal barcodes from an extensive barcode library to benefit from postal discounts and ensure mail compliance

**Control marks and barcodes:** Drive finishing processes on production machines and folder inserters to efficiently and accurately handle folding, inserting, and enveloping

**Finishing options:** Control all printer functionalities such as imposition, booklet, media, and tray selection

**N-up printing:** Step-and-repeat and arrange multiple pages on sheets

**Pre-flight checks:** Enable extensive preview, analysis, and test functions

### Various wizards

**Wizards:** Help to load data, manage folder inserters, and support imposition

# OL<sup>®</sup> Connect Desktop

## FEATURES AND FUNCTIONS

### Performance speeds

Achieved performance depends on numerous factors, including CPUs, RAM, storage speed, software configuration, and solution complexity.

### Operating system

- | Any 64 bit Windows Desktop or version that is actively supported by Microsoft
- | New versions of Windows are supported within the first 6 months of their commercial release

### System requirements

- | **CPU:** 8 64-bit logical processors
- | **RAM:** 16 GB
- | **Storage:** 100GB available on fast SSD for the system drive

**Note:** Minimum specifications may not produce the maximum performance from the system.

### Easily scalable solution

**Upgrade OL<sup>®</sup> Connect Desktop** to any other edition in the OL<sup>®</sup> Connect portfolio to benefit from increased output speed, process automation, and multi-channel delivery.

## Ready to get things done?

Let us show you what Objectif Lune can do.
